Communicate Better®
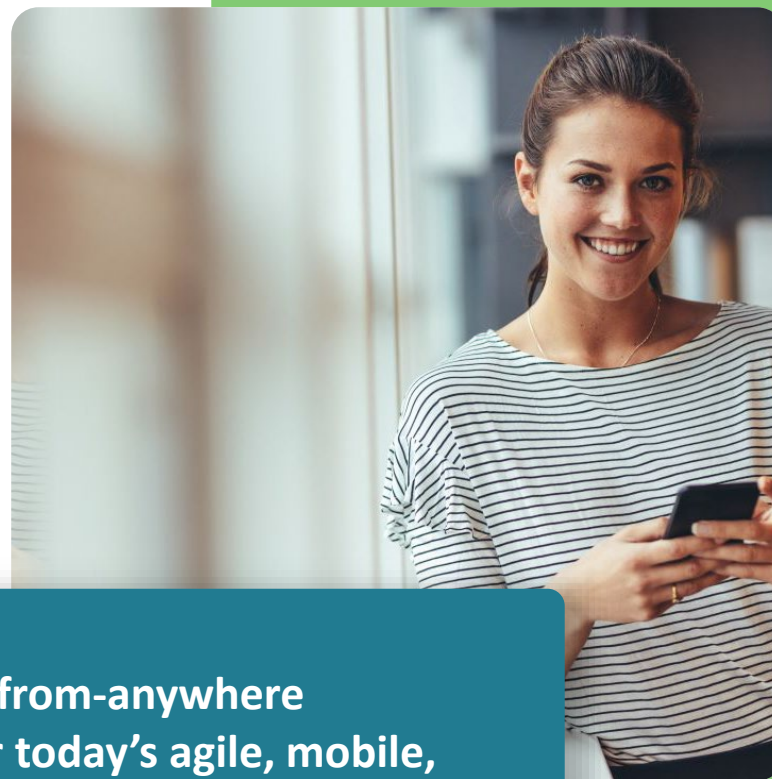

Small Business Phone Systems

What to look for in a phone system for your small and growing business.

The way people work has changed

These days work isn't a place you go, it's a thing you do. Today's workers need a way to stay connected and responsive whether they are in an office, on the road, at a job site, or working from home.

Look for a work-from-anywhere solution built for today's agile, mobile, and always-on entrepreneurs and growing businesses.

The Ideal Phone System Experience

✓ **No more using a personal number for work.**

Business phone numbers create a more professional appearance and give you more control over customer relationships.

✓ **Enterprise features for a fraction of the cost.**

Greetings, Automated Attendants, and Hold Music give callers a first-class experience even if you are a one-person show.

✓ **Easy implementation.**

Start communicating immediately after choosing your phone numbers. You should be able to use your mobile device, PC, or IP desk phone.

Work from Anywhere

Become More Efficient

Provide Excellent Service

Phone.com By the Numbers
