Business communications that's more than just talk.

Phone.com
Communicate Better®

Take the friction out of faxes.

Phone.com is the modern, work-from-anywhere solution for today's agile, mobile, and always-on businesses.

While many industries have moved away from faxing, it remans an important part of how business gets done in many industries including insurance and other financial services.

Paper fax machines attached to land-lines are cumbersome, prone to failure, labor intensive, and needlessly expensive.

With Phone.com, you can send and receive faxes right from your computer or mobile device. Have incoming faxes sent to your personal inbox or use a shared company inbox that all Phone.com users in your organization can manage.

Send up to 200 pages and 5 attachments per fax and instantly see the status of your fax.

The Facts on Fax:

☑ In order to accept inbound faxes, you must have a dedicated phone number. Phone.com **Pro** and **Plus** accounts include an additional number at no charge.

☑ Pro and Plus users can enjoy unlimited minutes for calling or faxing.

☑ You can send multiple faxes concurrently, meaning they will arrive according to their size, this way a large fax will not block any other faxes sent after it.

☑ Download the Phone.com mobile app to send and receive faxes right from your Android or iOS device.

☑ Enjoy unparalleled support. Our support team is standing by 24/7 to help you succeed.

Faxing is Just Part of the Phone.com Experience
With Phone.com, You'll enjoy:

No more using a personal number for business.

Business phone numbers create a more professional impression and give you more control over client and policyholder relationships.

Enterprise features at a fraction of the cost.

Greetings, Automated Attendants, and Hold Music provides callers with a first-class experience, even if you are a one-person show.

No implementation headaches.

Start communicating immediately after choosing our inventory of over 20 million phone numbers. Use your mobile device, PC, or IP desk phone.
